## ABOUT ME

I'm a **full-stack software engineer** with over **4 years** of professional experience. I graduated from Université de Rouen Normandie, France in 2020 with a **Master's Degree in Software Engineering** and started working at software consulting company **BearStudio**. Throughout my career, I've worked on a variety of projects, with tasks ranging from frontend to backend and mobile development, along with project management, teaching and public speaking. I am currently based in Toulouse, where I'm working as a software developer for **Elements Apps**.

## EXPERIENCE

### Elements Apps

Software developer / Oct 2024 - present day

- Worked on Elements' apps for Atlassian's **Jira Cloud** platform

### BearStudio

Software engineer / Sep 2020 - Oct 2024

- Primarily worked as a backend engineer using Spring Boot, on microservices and monolithic applications.
- Consulting for product oriented companies dealing in various types of businesses, such as **law**, **insurance** and **banking**, working alongside their IT teams.
- Gave multiple presentations, addressing tech-focused and broad interdisciplinary topics, as well as leading an **online conference**.

Internship / Mar 2020 - Sep 2020

- Curriculum completion through a 6 month internship.
- Frontend, backend, mobile development and project management.
